

# Completed Butterfly Habitat with Larvae

## Make a Habitat Stand

1. Cut out the pattern on this page. Tape it around and just under the rim of the Styrofoam™ cup.
2. Cut away the cup areas covered by the square pattern. Do not cut out cup areas covered by the two white blocks on the pattern or any part of the rim of the cup.
3. Turn the modified cup over. It is now a completed habitat stand.

**The pattern ends will overlap slightly. Tape the pattern in place.**
