

Making Connections

"Connections are links to my previous experiences."

"Connections are important because... They help me organize information in my brain."

"I use connections when I... Read something that reminds me of something I know."

"When I make connections I ask myself these questions..."

- How is this like something I've done before?
- How is this like something I've read before?
- How is this like something someone has told me or I've seen before?
- Then I use the connection to help me understand what I'm reading."
